Ms. H- Age 51

*In the first week after using iNAP, my **AHI dropped to 1.3** and my oxygen level increased from 86% to 93%. **My memory improved** and I **didn't have that foggy feeling anymore.***

Mr. P- Age 81

*"The CPAP mask was uncomfortable and the noise disturbed both me and my wife. Now that I am using iNAP, we both sleep better and are both delighted that I **don't have to wear a mask in bed anymore.***

Mr. L- Age 71

*"As a severe sleep apnea patient with an AHI of 72, I used CPAP for many years. After treatment with iNAP, **my AHI dropped to 0.5.**"*

Ms. S- Age 36

*"Prior to my diagnosis and treatment, I once fell asleep on my drive to work and almost caused an accident. That was my wake-up call. After receiving treatment with iNAP, **my AHI dropped from 43.2 / hr. to only 1.5 events /hr.**"*

Mr. T- Age 39

*"For 10 years, I wore a dental appliance to treat mild sleep apnea but, over time, I developed discomfort in my jaw joint. Fortunately I found iNAP Sleep Therapy and noticed that **my sleep quality improved, and was as effective as the dental appliance but didn't cause jaw pain.**"*

When CPAP and oral appliances just won't do.

An Innovative Treatment for Obstructive Sleep Apnea Patients

iNAP Lab + Phone App

- No Mask
- Superior Comfort
- Natural Breathing
- Clinically Proven

Track your usage and take control of your treatment data by downloading the iNAP Lab+ app from the App Store or Google Play.

SOMNICS

Intraoral Negative Air Pressure Therapy

iNAP
Sleep Therapy System

> iNAP may be for you if:

- you have been diagnosed with mild, moderate or severe OSA
- you can breathe through both nostrils
- you have front top and bottom teeth
- your doctor believes that you would benefit from iNAP therapy.

Are you ready
to start **iNAP** today?

How It Works

While you sleep, iNAP delivers a gentle suction inside the oral cavity, moving the tongue forward and away from the airway. When you're ready for bed, simply insert the mouthpiece and click on the power button. iNAP's intermittent negative airway pressure effectively eliminates apnea by keeping the airway open and allowing you to breathe naturally and sleep peacefully.

Without iNAP

Airway blocked by collapsed soft tissues.

With iNAP

Negative pressure keeps airway open.
